AutoCAD is also available as mobile and web apps. AutoCAD 2012 AutoCAD 2012 is an extension of the previous AutoCAD release, it adds 4D printing and collaborative editing. It is the first version of AutoCAD to natively support the widely used Web-based collaborative editing platform, EtherCAD, in addition to Microsoft SharePoint Workspace. Main features: 4D Printing: With AutoCAD 2012, users can now easily create high-quality 3D digital models of physical objects, which can then be converted into high-quality 3D objects, ready for printing, in real time. These 3D models can be 3D printed in a wide variety of materials, including 3D printed plastic, 3D printed metal, 3D printed rubber, and even 3D printed soft polymer or similar materials. Collaborative editing: With the newly added collaborative editing feature, users can now create and store documents in the cloud. Anyone with a web browser can view and edit the documents, all while storing them safely in the cloud. The documents can be accessed by any device, and can be viewed with any browser. Documents stored in the cloud can be edited on multiple devices simultaneously. EtherCAD support: AutoCAD 2012 supports the popular Web-based collaborative editing platform, EtherCAD. EtherCAD is a well-established cloud-based platform, and supports a wide range of functionalities, including smart drawing, creation of layouts for 4D printing, and supports both free and premium versions. Steps for installing and using AutoCAD: Download and install the

(Chesaning, Mich.) and the Genesee Farmers Cooperative have teamed up to release a new rye beer. The Buffalo Spotted Rye is a 4.9% ABV pilsner, brewed in collaboration with Small Town Traders. The beer was brewed in small batches with a dry-hopped rye wheat in the mash, giving the beer a distinct rye flavor. -Advertisement- After the mash was fermented, the beer was dry-hopped with freshly-extracted Citra hops. The beer's coloring comes from the wheat in the malt, which is the same type of wheat used in Buffalo Spotted Wheat, which also can be found in the Genesee Farmers Cooperative brewing program. You've got to watch this for a demo of Markup Assist Multipart Object: Developing complex parts, such as aircraft wings and parts from custom 3D printer parts, is now much easier. Multipart objects are full-featured, part-based objects. Object properties are now accessible through the part numbering system, object properties such as layer, color, and fill also apply to all parts. And in the official blog post, scroll down to read all the details about multipart objects. Revit: Revit users get to take advantage of the content export improvements in the Revit 2020.4 update, including support for the new.rstx (XML),.rstc (RSTC), and.rst (RST) file formats. Now you can be sure to download a model in.rst, not.dwg! Views: Views-based drawing output options are now available for the Sheet Set and the Sheet Viewer, in addition to the sheet dialog box. The new options include exporting to DXF, DWF, PDF, and PDF/A-1a and generating png, jpg, and eps graphics. Data Management: An improved Data Management System provides users with greater management of data. Managing a drawing, with multiple versions of files in different file types and a large number of data sets, is much easier and faster. Preview of the new data management system. Inventor: Support for creating dynamic instances in the User Interface (UI) and programming environments has been added to the Inventor interface. Instances include dynamic characters, which are fully animated characters that move and respond to user actions. The user interface for creating these instances is now open for all versions of Inventor. Animation of an instance in the UI, in Inventor 2010, 2011, and 2019.
