======================= It is the turn 1 on the game which the scenario of the game will be opened up. The start is the same as the scenario of game 1 except for the arena. The arena is a small enclosed area which is big enough for the players to play their 2-player games. Each player then tries to move their units through the areas while avoiding the other's units. It is recommended to move 2-3 spaces or less when moving through the arena to avoid collision with other players'

units. When the game is finished players' points will be counted and the game will be won by the player who has the highest score. Judges' comments: ==== This is a 2-player game for which the players both try to move their units around the arena avoiding collision. Players have to be careful when they move around the arena as they will collide with each other so slow movements are recommended so as not to collide with each other. When your opponent blocks a move make sure to follow your block to a different area. When your opponent unblocks you and moves in to a new area don't try to follow or block them. Instead try to move out of the way of their unit. Units that are not currently in the arena can be moved if they are adjacent to an area with both players present. If you block a unit in the arena that you are not adjacent to then you don't block them! Otherwise moving a unit adjacent to a tile that your opponent is already adjacent to will block your opponent from moving into the next tile. Units that move out of the arena must be adjacent to an area that has both players present or they will just ignore the player.
