- Play "FIFA 22" with the best version of the game engine
- Tackle moves and blocks are improved, with new timing and balance adjustments
- Aerial duels have been overhauled and players can now control a ball based on the correct movement speed
- Player reactions and fatigue effects have been modified
- A raft of new touches to improve the on-pitch visual experience
- More diverse and realistic crowd environments

FIFA 22 introduces HyperMotion Technology, a revolutionary new on-field gameplay experience that creates a more dynamic, authentic and challenging game by using motion capture data collected from real-life footballers. Players now move, tackle, block and run using the same movements as the players they watch on television. This revolutionary gameplay technology is what gives the game its unique player experience. High-quality 3D characters accurately reflect players' movement and movement patterns.

Players make accurate tackles and blocks, creating authentic physical reactions as they are challenged. Key Features

- Introduces 'HyperMotion Technology' for the first time in a FIFA video game
- Uses the best version of the game engine in FIFA to deliver the best gameplay on console
- Upgraded AI, making opposition players behave more intelligently and improving teamwork
- New visual effects, including improved reflections and a new direction-aware lighting system
- Challenging new match moments, including player fatigue and natural movement breaks

Motion Capture Data During gameplay, the game captures the movements of players and places them in a virtual world, tracking the players from 30 different cameras throughout the stadium and on the pitch. The movement tracking data is then used to power the camera and player animations in FIFA 22. FIFA 22 puts you in the heart of the pitch. Players run, tackle, block, pass and get on with their game. Keep up with the action and discover a FIFA like no other. The

results:

- The game engine gives the game dynamic and varied player behaviours and reactions
- The new 3D character reflects players' real movements on the pitch
- The game engine now captures players' fatigue after a long match and better simulates fatigue moments on the pitch
- Players' movements, including the step back, have been optimised
- Better controls, with players using the correct movements for passing, shooting and movement, alongside new options for post-match replays

Features Key:

- FIFA 22 adds a dynamic 'Fusion Engine,' creating new game-play and visuals that let you feel the difference between a full-on challenge and a simple dribble. Stability, control and accuracy are your priorities in FIFA 22 – completing challenges and managing more difficult elements of the game requires more skill than ever before.
- Discover new game-play styles, with new explosive dribbling and simulated flying animations.
- FIFA 22 introduces the new Quick Play pick-up mode
- New challenges that make the most of your game-susceptibility
- Groundbreaking LIVE NOW online beta
- Brand new Player Retraining tool
- HyperMotion Mocap Technology
- CPU Teaming tool
- Custom Tactics

The next thing I did was call a friend of mine, and I had been on the phone with him just talking about how Japan has gotten super into Bitcoin, and how it has fallen right about 2,000% and so the Bitcoin price was going to drop, and I said hey, do you think I can ride

this up over \$5,000 by the time the day is done? He said, yeah, I think you can, and then I lost \$4,000 and I was done. I was good. In a nutshell, I think Japan got the Bitcoin bug, and the only thing that will really slow down Bitcoin there is not any regulation whatsoever. It seems like even with the whole Mt. Gox thing, the government and the banking system in Japan are just fine with it. My feeling is that within five or ten years, if Bitcoin continues to gain in popularity in Japan, it's going to get real big, and once the big corporations start using it for real, it's going to go down. That's my opinion on it. Jason: That's a very strong opinion for you. Leigh: Yes. And it's going to really throw a wrench into the whole idea of anonymous money. When companies start accepting it, then you're not going to be able to buy anything anonymously, because a couple of companies can track it back to you. Jason: Well, Leigh, I've enjoyed your time on the show, and I just want to thank you so much

for sitting in for a few minutes. It
