### Features Key:

- Win with the Ball - FIFA 22 Revolution Kit's new pitch intelligence completely alters the way you play by changing the way the ball behaves in the air and on the pitch. The pitch intelligence has been tested and refined on the most natural pitch, FIFA's own pitch, using free motion in-game technology called Flow3D. This technology captures and adjusts thousands of key input conditions every millisecond. Instead of just reacting to changes in the ball's path, players will be able to read the results of their decisions directly on the pitch.
- Dynamic Player Kicks - The net force of a player kick is now calculated dynamically, automatically adjusting to the player's personalized movement characteristics. Dynamic Player Kicks react to how fast players move, how quickly they move, how accurate they are, and are fired at modified angles depending on current momentum.
- Playmaker Ultimate Control - In this new version of playmaking, players can use the FUT Moves tool to create custom, customizable team-themed dribble moves that players can use to beat opponents.
- Real Player Physics - FIFA 22 introduces a new Physics System, providing players with more control over their movements and overall agility. Whether during contests or in mid-air, players can now feel the impact of the ball on their feet, react to momentum changes, and benefit from increases in fitness.
- FIFA On the Ball - Developers at EA SPORTS wanted to blur the lines between player and ball, so included a dramatic change in how players react to the ball's trajectory, shape and weight. In other words, the ball feels more "real" in FIFA 22. Players will also detect pushback from objects like walls and opponents that will influence their decision making.
- RUMBLE GOAL - In the new "Rumble Goal" feature, a swarm of AI defenders will encircle a player in possession of the ball and any players nearby. Rumbling will also ensure the ball doesn't come out of a dead ball situation.
- COMMUNITY PLAY - Introducing Community Play, FIFA's biggest ever offline mode, that allows players on the same custom or offline FUT servers to compete head-to-head for the same custom teams in established FIFA challenges including Local League, Off Season mode, New England Revolution Manager Challenge, Schedule a Game and more.
- NOT JUST ONLINE! - Fully balanced offline
