Download GTA IV Multi Repack VLC Media Player.The present invention generally relates to a navigation system, a navigation method and a navigation apparatus, and more particularly, to a navigation system, a navigation method and a navigation apparatus in which a moving position of a mobile terminal is automatically notified to a drive unit such as a vehicle, etc. and a target is automatically notified to the mobile terminal. Recently, a navigation system is demanded to be capable of providing various necessary information to a moving body such as a vehicle, etc. so that the moving body can conveniently reach a desired destination and return to the moving body. Such a navigation system is disclosed, for example, in Japanese Published Unexamined Patent Application No. 5-97688. In the navigation system disclosed in the above-mentioned Japanese publication, the current position of a vehicle is automatically detected and a current time is detected. The distance (in kilometers) to a target place is indicated on a display screen of the vehicle. In the case where it is inconvenient for the driver to manually search for the target place while driving the vehicle, the target place is automatically suggested to the driver. As a result, it is possible to reduce the workload of the driver while driving the vehicle. The navigation system disclosed in the above-mentioned Japanese publication is so constructed that the target place is automatically searched for the driver and the target place is automatically displayed on the display screen of the vehicle. In the case where the navigation system is mounted in a moving body such as the vehicle, the target place is automatically searched for the driver. The above-mentioned navigation system has a problem. In the case where the information related to the target place is stored in a memory, the navigation system is mainly used in a moving body such as a vehicle, etc. Therefore, it is difficult to find out the information in the memory. In the case where the moving body is not used, it is difficult for the driver to find out the information in the memory.This invention relates to central processing units,

and more particularly to methods and apparatus for implementing processor instruction sets, and in particular to methods and apparatus for implementing instructions for dividing, multiplying, and so forth, as well as to improvements in the operation of such units. Various central processing units are known in the art. Such units are sometimes referred to as microprocessors. In known microprocessors, single instructions of relatively long duration are accepted and decoded. The decode operation is performed at a rate of 1-2 instructions per
