Temporarily unavailable. Pilot1 Sampson White Doug Skidmore There are 6 Endings for this game. Each requires a certain amount of dots to complete, so whoever gets the most points will win. The goal is to have as many number of dots as you can, when all 6 are completed, do a power-up to have a disadvantage on your opponent. Board Game BasicsThe Towers in this game are a 3D design based on the classic game tower from Lincoln Logs. All of the cards have a dot number on them. Each card is a different size and some are square. The dot on the cards is on the bottom of the tower. You will need four dice for this game. The dice are for the following: • Place • Hit • No Hit • Power Up • Power Down To play the game:1. Start by drawing a card. This is a card that decides who goes first. You can go from 1-3, 1-2, 2-1, 2-3, or flip a coin. 2. Draw the card that is at the top of the pile of all the cards. The player to the left of the first player will be the next person to play. Then place the top card down face down on the board. 3. For each dice that you roll, determine where you are going to roll the dice. You will have a choice to place where you want the dice to land. If you do not place any dice on the board, it counts as one of your choices. You should roll the dice on the board. Roll the dice from 2-6, do not roll a 7. Once you have four numbers on the dice, you can place the dice on the tower face up. If you roll a 7, you will automatically choose to roll again. Also, roll a 2 on any die. If you roll a 2, you can move the dice back and on the board. All dice rolled during the game count toward that roll. 4. Use the numbers you have on the dice to build the tower, one dot at a time. The dots line up like the tower. You can move the tower up and down the numbers of the dice that you rolled. For example, if you roll a 1 and a 4, then you place the tower with the face up 1, the face up 4, then the face down 1, and

Download War for the Crown AP 6: The Six-Legend Soul (PFRPG) 1.3.0 Demo here. Voted best Comedy PBT Parody at the 2017 Parodycon convention, 'War for the Crown' is now available for your RPG needs! In this sixth exciting episode of the 'Counterpoint Campaign Guide' series, you play the Game of Roles that shapes into the War for the Crown for the Kingdom of Earth... Despite decades of secretive military buildup, the kingdom of Earth is still unprepared for war with the Orcs and the enemy's fleets begin massing to launch an assault on the planet's globe! As your characters spill out of the Palace Square and into the streets, you must navigate the terrain, conduct diplomacy, and make strategy decisions while battling evil, making plea to gods for aid, and breathing the glorious-but-eager-to-possessor demons. How this became PFRPG's most talked about AP has as many questions as you. What aliens got there first? What person(s) brought the demons to Earth? Why would a capital planet be threatened by three different races? The answers to these questions and more can be found in 'War for the Crown', now available for the PFRPG. "I've always planned to run a war campaign where your characters have to decide how to battle for their lives on a world where they have no choice. I did not

realize the exact ramifications it would have, but from several things I've enjoyed and taken away it won't be so insular. I love 6th-grade policies and that's what I wanted this campaign to feel like. I wanted to treat characters like they are in a war, with clear sides, allies, enemies and you're dealing with extremely different conditions as a result of them never leaving Earth. I also've been told it was hit a true nerve with people because their brains are often battling against their primitive self in trying

Idle Expanse is an infinite strategy game that takes place in a galaxy that just won't shut up. You play the role of the planet's wealthiest industrialist and your greed knows no bounds. Your objective is to grow your wealth beyond what anyone has ever imagined, but why do it yourself when you can hire others to do it for you? Core gameplay revolves around hiring mercenaries, equipping them with the most "state of the bada** art" weaponry and gear, then sending them to remote planets to collect resources. Unlike most other incremental games where you send teams heroes out and just wait for their return, Idle Expanse allows you to have (in)direct control over what your mercenaries do and how they achieve it. Prior to deploying a squad of mercenaries to a planet, you get to decide what tactics they'll use: Will they all stay together or will they split up? Will they seek out and engage enemy aliens or will they focus on gathering resources? As your squads of mercenaries explore the galaxy, they'll uncover new technologies, which in-turn will unlock new features. One such feature is the ability to skip forward in time - why sit around waiting for your squads to return from their deployments when you, with the simple press of a button, can jump into the near future? Your reputation will be incredibly high, but this is about as far as your reach can reach. As the galaxy's largest corporation, your job is to manage a fleet of over 30 ships, each with their own special abilities, and hundreds of mercenaries. You'll manage everything from resource gathering, resource security, cash management and combat. You're the boss, and your employees are your life force.
