What's new in King Arthur: The Saxons:

The previous Chitose Shrine's kit is already up. In the example below we will be using the same model, but in new kit. Though I am not going to bother with the 'Shrine Seirei' body, the 'Demon Priest' will look fantastic when pasted on the body. I like effects on the hands, but if you want the kit be based on a Ueshiba Musashi pattern, use purely smooth hands, like in the example below. Sketch: Conclusion: The faces of this kit is way more unique than any of my previous works, but there isn't much to say about it. It would be the favorite of all of my kits, due to the amount of distinctive details to it. Of course, of these sketches, it isn't as grand as the original, but I believe it to be something that can be used for future Chitose versions of kits. The next kit is a weird one, because it doesn't have the least amount of noticeable differences between other kits. I deliberately went with a kit based on the Chitose Seirei's model because if I didn't want to model that kit, I did end up thinking of using this one. While I'm sure the Seirei's model isn't really as simple as I've made it to be, this kit still was quite a challenge for me. It's alright if it looks a bit too Japanese, but I'll be honest here: The demon kits from the Naruto series is the only part of me in which I'd like to express myself in real figure modeling. Meaning I wanted to make this kit into the demon kits which I enjoyed the most, and with that in mind, I chose the unrealistic kind of eyes which could have been true to the character, while also sticking to my usual figure proportions. They are quite different from the original, so I don't think it'd be a bad idea to have someone who should be familiar with that add this kit to their collection. With that, let's get to work! Comparison Between Original and My Kit: Paint Check: Here we go; the full paint job on this kit. It's only a matter of (very few) minor adjustments. Still, I should note a few things here. First of all, this kit is quite simple, so I may not always paint lots of details. This kit will be lengthy, but there is no
