If your Autodesk Account shows that you have a serial number and product key associated .Phantom of the Megaton: The Target of a Nuclear Missile and How it was Stopped In 1977 the Soviets tested a new generation of long range intercontinental missiles. The sudden and unexpected giant explosion created a mushroom cloud so tall that it became a major problem for the American hostages held in Iran. Their ordeal lasted almost four years. The original title, The Target of a Nuclear Missile, is for reasons of dramatic irony. The people on the ground know it's a mushroom cloud they're chasing. In fact, it was the book's title which first alerted the Soviet Union that they were responsible for the disaster. Phil and Judith Behr, a husband-and-wife team of scientists, track down the bomb as it hurtles towards Moscow. As the Soviets dig deeper, the knowledge they uncover slowly begins to unravel the inner workings of the missile itself. This final section, which tells of the monster missile's final journey to its resting place, is the part of the book which inevitably raises a smile and an ironic thought. Highlights ·The book shows that a giant mushroom cloud will hide a huge explosion from view. The only people to have seen the whole thing will be soldiers on the ground, several days later, some hundreds of miles away. But it means that a nuclear bomb can be seen and tracked by satellite ·The various Soviet weapons specialists try to work out what went wrong. They finally conclude that the fuel rods were contaminated and in the wrong section of the reactor. ·The description of the aircrew who fought against all the odds to land the plane makes an excellent illustration of the human factor in nuclear command.Preoperative cervical sagittal balance as a predictor of posterior uveitis after cervical surgery. The aim of the study was to investigate the incidence of posterior uveitis after posterior cervical surgery. The authors conducted a multicenter retrospective case series. This study enrolled 252 consecutive cervical surgery patients (277 eyes) who had undergone posterior cervical
