Visit us on Facebook: How to properly call bash function I am newbie here. In Linux/Unix script file, I tried to make a function like function text_sum() { echo "This is function " echo $1 echo echo "End of function " } and call this function like echo "Textsum of 1-10" text_sum 1 echo "Textsum of 1-10" text_sum 10 but I am getting error: line 7: function: not found Why this is happening? A: You have to use $(....) to capture the argument function text_sum() { echo "This is function $1 echo $1 echo echo "End of function" } and call this function like text_sum 1 text_sum 10 A: In bash, functions are written within the $(...) and $() Q:

Readying for Actions

Characters become stronger and stronger according to your actions.

Start with a "stock" equipment and increase your levels with luck.

Then use the skills you earned to level up, examine new disciplines, and become the strongest in the Lands Between.

If you align your action with the blue line, you're guaranteed to raise the level of strength and attributes and improve your skills and equipment. When your status matches that of the blue line, aim for EXPLOSION.

The blue line changes with every attack, and you can passively and dynamically access it during battle by pressing the blue button. The blue line impacts your combo count and EXP gain.

When you advance along the blue line, you learn new techniques and can even learn exotic arts from lethal elementalists, arms craft experts, and demon slayers. It's the key to achieving victory in battles.
