---

One such giant spacecraft is the TurGUL of TURGUL: RAPID FIGHTING. A valiant shepherd ship foiling an invasion of enemy TURGUL terrorists which seek to destroy a human colony founded on the planet TurGUL.

The story is set in the 25th century. Rival space empires of humans and TurGULs vie for dominance. Human trade depends on the resources and status of the colony of TurGULs.

As such, humans lay well sited colonies all over the territory of their rivals. TurGULs, fearing that their territory will be attacked, devise assailable gravity devices. These gravity drones are capable of making an object a moon-sized target. Objects would fall into the oceans, lakes, and rivers.

However, one day these massive gravity drones took the TurGULs by surprise. Humans

Metempsychosis: a progressive first-person horror game In this game you can choose the path to real psychological illness, or you can choose the path to psychological health. START? I want to tell you about the day when everything went wrong. You don't know me. I am the killer. If you say "no", you're just an obstacle for me. You deserve to die. If I say "yes", then maybe I can help you - there is a possibility that we can find a way out together. You are a beautiful and intelligent girl. You keep dangerous things in your mind - the loss of your parents, accident in the forest, your first love, the never-ending fear, loneliness, unanswered questions, etc. I can't ignore you. I simply have to catch you. My method is simple. I am going to take something from you and than I'm going to kill you. My task is simple. I need to remind you about your actions and emotions. You know that something is bad for you. But it is always too late. I will help you to solve this problem. The Player is a girl who tries to find her way out of a mysterious world, which is ruled by a psychopath. This psycho has three ways

---

to reach the Player: by killing her, by a hallucination or through a game. In this game, the Player doesn't confront the psycho directly. The psycho is "in the game".

Metempsychosis is a first person narrative game: 1. a- first person - the player will be treated as a person b- the player will experience stories (texts) c- the player will use his emotions to interact with the game 2. a- isometric in style - the game will be played in the first person, but won't look directly ahead of the player b- similar to old "The Last of us" - a peaceful, small town, where the player will get into confrontation with a killer. 3. a- lies in the world - the player will play a text (story), but the game will look as if it is happening in the world. b- lies in a real world - the player will play a story, but the world will look as if he is walking around there. Next comes the interview with Arno Widmer, lead designer at HeadSpun Games

**Gameplay Design Workshop: Games That Work** An independent action-RPG that in combination with a handdrawn touch makes the gaming experience more touch-friendly. One click to battle Enhancing the gameplay experience by integrating the "one click to battle" game characteristic. Playable Old School Style The game concept is based on the play system of an old school dungeon crawler. The Obsidian Entertainment-Team specializes in digital game productions and has established itself in the role of independent studio for games such as Fallout 3 and Star Wars: Knights of the Old Republic 2: The Sith Lords. Their new studio, Obsidian Entertainment-Galactic Reaches, is the result of this collaboration that they have announced during GDC 2014 and will take responsibility for new projects in the coming years. The development team has a renowned talent, excellent knowledge of the RPG genre, as well as a history of producing talented game concepts and an impressive track record of satisfying its players. So, why then appeal to the Gamedec audience? Much of it is a result of the fact that Star Wars: Galaxy of Heroes is not just a Star Wars game, but instead it is a completely different RPG with a richly woven RPG gameplay. Two teams of enthusiastic fans and gamers had the courage to dream up Star Wars: Galaxy of Heroes as a new never-before-seen game. Their goal is to create an all-in-one action-RPG that combines both novelty and classic gaming concepts. Its gameplay combines the "one-click-to-battle" game characteristic of all Star Wars games and the hand-drawn, classic style of traditional JRPGs. WIXOSS was conceived by Mike Fahey and Michael Kjuka, who

**North Korea has reportedly shown interest in buying a Chinese missile defense system amid tensions with the U.S. Bloomberg News said this week that the communist nation has expressed "interest" to buy five of the THAAD anti-missile system from a Chinese state-owned company. Several Russian companies and China's Norinco want to join the \$20 billion deal, said a person familiar with the matter, who asked not to be identified because the discussions were private. In response, the U.S. on Sunday reiterated warnings for countries and companies to exercise "extreme caution" when dealing with North Korea, The South China Morning Post reported Thursday. "There's a lot of money to be made in their pockets, but there's an awful lot at stake for us, too," the official told the newspaper. The THAAD batteries would be deployed near Pocheon, South Korea, just outside the south-central city of Seongju, per the Bloomberg report. A visit by Chinese President Xi Jinping to the North in early October was seen by some experts as a coup for Kim Jong Un, the third-generation leader that reportedly masterminded the test. Kim returned from a June trip to Beijing, where he expressed a willingness to seal a deal with the U.S. "This is the most important progress that has been made recently in the history of the Korean peninsula," Kim said at the time, according to the**
