Registry Mighty

Registry Mighty is a Windows registry cleaner to rapidly resolve (sometimes even automatically) the registry errors reported by Windows Error Reporting. Besides, Registry Mighty will display the existing registry problems (such as missing files, invalid system files, or invalid permissions) and quick fix them in a friendly & neat interface. With it, you can clean your registry fast, easy and effortlessly. It's Time to take a Rest Easy! (For Real!): Desktop & Network Activities are recorded to help you find system problems. If activity slows or freezes for a while, a 'freeze detection' feature will highlight the session. This feature can give you a good hint whether you have to re-boot or power off. If your system goes down the'recovery

log' tab will show you the reason and what to do. You can set the program to reboot on errors, to open the log window or alert you manually. What the... It's Time to Take a Rest! (For Real!): When you are running a program and the computer slows or freezes, the Desktop & Network Activities tab will keep track of the session. After it closes you can check it and see if you have to re-boot or power off your PC. If it freezes for a while, we'll trigger a warning and give you hints to solve the problem. Runtime Debugging: You can get comprehensive and immediate information while it is running. All the components and variable assignments will be shown. On Demand Maintenance: With a free Internet connection, you can run the maintenance tool anytime to check your system for outdated programs or any unnecessary files. You can get comprehensive and immediate information while it is running. All the components and variable

assignments will be shown. When you are running a program and the computer slows or freezes, the Desktop & Network Activities tab will keep track of the session. After it closes you can check it and see if you have to re-boot or power off your PC. If it freezes for a while, we'll trigger a warning and give you hints to solve the problem. On Demand Maintenance: You can get comprehensive and immediate information while it is running. All the components and variable assignments will be shown. We Support Windows 7, 8, 8.1, 10 and XP.
