Individual maintenance of reservations and creation of daily reports
Production of invoices
Availability of videos and links to websites
E-mail support
Hotel Booking Software Features:
Automated data entry
Real-time reporting
Detailed billing
Generation of invoice invoices
Data management and management of customer databases
Printing reports and invoices
Presentation of Hotel Booking Software's main window
Hotel Booking Software allows you to manage a database of all your customers' data:

- The hotel register
- The customers' database
- Booking data for all your rooms
- The reservation data for each room
- Invoices
- And even more

With this application, you are able to add new customers, modify existing customers, create new reservations,

edit their details and keep track of each room's occupancy and availability. The application also gives you access to multiple reports so you can stay informed of all your reservations. You can also send invoices to clients and keep track of payments. The invoice will then be printed in the application and dispatched with the collected money or service. The application is fully compatible with Microsoft Word and Excel, along with Access and OpenOffice to extend your possibilities. In addition, you can access all the important features from any Internet browser. The application is also able to generate automated e-mail reports, keeping you informed about the status of your reservations and customers, as well as allowing you to update the data or make important changes, immediately. You can also create different types

of invoices, which you can print out and send along with your payments.

Hotel Radio and TV Management
Software is a custom-made application that simplifies the management of multiple radio and television channels. This software contains a database with details about multiple radio and TV stations.

Hotel Billing Software

Hotel Billing Software is an application designed to offer you a more efficient way of keeping track of bills that are made out in a hotel or restaurant. It displays a user-friendly interface which makes it accessible to people of all experience levels when it comes to computers. You get quick access to all its main functions from the main

window, in a straightforward manner.

A bill is easily created and customized with details about the customer's name, address, table, waiter and details with the items in the order. If during the service of a customer an event is worth mentioning, the application offers you a text field for remarks. Items are added to the list by simply clicking an empty information field and selecting the desired content. In case a product isn't in the database, you can add it in a few steps by entering information about its number, name, category, rate and remark. The item is then available in the application until you delete it. In the same simple manner, you are able to add and manage new categories, pricing units, employees and taxes. This makes it possible for you to adapt the application to any kind of service that requires

billing. With Hotel Billing Software you are able to manage multiple records at the same time and create daily, weekly, monthly and yearly reports. All of them can be saved in RTF and PDF formats and printed later if needed. The application is also capable of saving all the bills created across a long period of time and adds them to a database. This way, if you lose a printed record, you can always recover the information. In conclusion, if you're looking for a comprehensive and efficient way of keeping detailed records of bills, you should definitely try Hotel Billing Software.
