To date, there is limited published data on the long-term effects of DMPA. Our objective was to study the effects of DMPA on carbohydrate metabolism during pregnancy.Methods - We conducted a prospective multicenter cohort study in three tertiary-care centers in Korea. A total of 405 women were enrolled, and 362 completed the study. At enrollment, serum glucose levels were measured at fasting, 60 minutes, 90 minutes, and 120 minutes after oral glucose load, and at 24 hours, and again at 6 and 12 weeks after delivery, and glycosylated hemoglobin (HbA1c) levels were measured. Furthermore, a 75-g oral glucose tolerance test was performed at enrollment.Results - The median duration of exposure to DMPA was 8.3 months (range, 1-41 months). A total of 243 women (62.0%) were exposed to DMPA from pregnancy through lactation. According to nonlinear regression analysis, a significant correlation was observed between HbA1c levels and the duration of exposure to DMPA, after adjusting for covariates, including age, history of hypertension, body mass index, gestational week, and delivery type (P =.003). However, there was no correlation between HbA1c levels and glucose levels after adjustment for covariates (P =.145).Conclusion - A longer duration of DMPA exposure was associated with increased HbA1c levels during pregnancy.Q: PHP inside HTML for jQuery I am looking to add a PHP script into an HTML page for jQuery. I have a JavaScript object that allows me to do a lot of fun stuff and I need to add a database connection. I would prefer to do this through php rather than JavaScript as I feel that JavaScript is a bit to easy to crack. I understand that you cannot output PHP directly inside an HTML file so what is the best way to do it? A: There are a few ways to do this.
