- Small toolset and website that can optionally monitor your network card throughput and produce reports on usage - Reads your modem settings - In-built a modem throttling algorithm - Can optionally monitor your network card throughput and produce reports on usage - Optionally send usage reports to your email - Can optionally give you your hourly usage as a text file - Allows you to setup how often usage reports are sent - Allows you to set whether it should drain your phone allowance when reporting, and how many reports you can have sent at once - Drag and drop of data usage file and SMS file - Call statistics Modify Previous User Added a feature to allow you to modify the previous user for multiple usage reports. Usage Agent Issues: - Usage Agent doesn't work on machines that are only connected to the internet via a router - Some ISPs have incorrectly blocked Usage Agent, use a proxy or public wi-fi to connect to the internet Usage Agent Improvements: - If a modem is reset while Usage Agent is open, it will still work as normal until it has finished updating - Allow requests from more domains than just 'usage-agent.com' - Add more formats for sending usage reports - Option for the usage agent to send usage reports to a different email address than your normal email address Usage Agent Features: - Add a feature that allows you to have unlimited usage reports at once - Add a feature that allows you to have unlimited SMS reports at once - Can optionally throttle usage reports - Add a feature that allows you to set whether it should drain your phone allowance when reporting - Can optionally add a counter to your reports - Option for the usage agent to show usage on an hourly basis - Option for the usage agent to show usage on an daily basis - Option for the usage agent to show usage on a weekly basis - Option for the usage agent to show usage on a monthly basis - Option for the usage agent to show usage on a yearly basis - Option for the usage agent to show usage on a monthly basis - Option for the usage agent to show usage in year tabular format - Option for the usage agent to show usage in month tabular format - Option for the usage agent to show usage in week tabular format - Option for the usage agent to show usage in day tabular format - Option for the usage agent to show usage in hour tabular format - Option

What's New In Usage Agent?

Use the 'Usage Agent' to monitor, manage and report on your bandwidth usage and network card throughput. Currently, it works with 5 ISPs. Usage Agent Features: Track your ThroughPut, using your ISP's usage page, every two seconds. This uses a bit of overhead. Monitor your bandwidth usage at any time. This tool will help you to track how much data you use everyday. Installation: You will require the following items to install. · AntiVirus software such as ClamWin or Microsoft AntiSpyware (for Windows) · USB Modem A) Unzip the zip to your desktop. B) Run setup.exe and follow the on screen instructions. C) Run the new copy of UseAgent.exe to verify the setup has been completed. D) Shut down any running instances of VHats Monitor on your PC. E) Restart your computer. F) Re-open VHats Monitor. D) Connect to the modem. G) Reboot the modem and you are now ready to monitor your web usage. If you encounter any problems, or require help in any way, you can contact VHats support. What's new: · New ISP's and DNS servers to choose from. Currently, Usage Agent supports the following ISPs: Optus Telstra/Bigpond aaNet Exetel Exetel Wireless OntheNet AAPT g-node amnet dodo EFtel Internode ComCen ADSL shaped plans Westnet · Added option to write your own ISDN number (Ex: 1302) · Reports added for: bandwidth usage, web pages viewed and requests for static pages. · A new icon, on the VHats menu is now available to select your current ISP. · A bug fix for Android boxes that could lose connection during connection attempts. The usage report is divided into the following, 'Dummy' and 'Active'. You may have a few dummy queries and a certain number of active queries. 'Dummy' is used to report the bandwidth usage and to monitor the throughput. 'Active' is what users use and what is actually counted against their service. If you have any problems with your service or ISP, or have a suggestion or feature you would like to see, please contact us. Note: If you are running AntiVirus software
