After Carpal Tunnel and Sciatica are treated and controlled, some patients go on to develop a condition known as Neuropathic Arthritis. Unlike a torn tendon, a torn nerve is far more painful. So is there hope? After carpal tunnel surgery, the median nerve is often damaged. If this nerve does not heal correctly, it can cause compression, trapping the patient in severe pain. This is called a neuropathic arthritis. Symptoms of Nerve Injury If your hands hurt, do not ignore them, because it may mean the median nerve is being trapped. In some cases, the nerve can cause pain in the hand, or above or below the wrist. Sometimes it is difficult to tell if carpal tunnel surgery really worked, because the pain will seem to come from a nerve problem instead of from the wrist swelling. The symptoms of a nerve injury may be as frustrating as the pain and swelling in your wrist that is related to carpal tunnel surgery. The main reason for nerve injuries is age. In people over 55 years of age, the median nerve becomes vulnerable to injury. When the nerve is compressed from carpal tunnel surgery, it is vulnerable to becoming injured. Drs
